Year of Registration: 01.10.2015

Project Supervisors: Dr. PR ANAND VIJAYAKUAMAR

Research Abstract (Not more than 100 words: Please work on this space creatively to brand your Portfolio)

Lung cancer is most commonly diagnosed cancer world over and is the major cause of deaths among all type of cancer. In India it constitutes 14.4% of all cancer and noted in early age also. This study is conducting in a rural area of North Malabar region of Kerala. In these areas, nowadays mortality rate due to cancers is highly increasing and many deaths are reported due to various cancers. After completion of my work, I expect to find out the prevalence of lung cancer, smoking pattern, relation of education, histological classification, quality of life etc.

Fellowships: Govt/Non-Govt- NIL
